More functions & more fun

Timing task

Login your Reco account, click “Task” -> Click “+” on the top right corner -> Click “Timing”.

You can turn on/off the appliances at the set time.
E.g. turn off the light at 9:00 am.

The screenshot shows the 'Timing' configuration screen. At the top, there are tabs for 'Timing', 'Period', and 'Delay', with 'Timing' selected. Below the tabs, there are several input fields: 'Name', 'Default name' (with a close icon), 'Object', 'Select Device', 'Event' (with 'Turn On' selected and a green checkmark), 'Turn Off', 'Time', 'Set the execution time' (with a close icon), 'Repeat or appoint a date', and 'Never' (with a close icon).

Period task

The screenshot shows the 'Period' configuration screen. At the top, there are tabs for 'Timing', 'Period', and 'Delay', with 'Period' selected. Below the tabs, there are several input fields: 'Name', 'Default name' (with a close icon), 'Object', 'Select Device', 'Event' (with 'Turn On' selected and a green checkmark), 'Turn Off', 'Time', 'Set the starting time' (with a close icon), and 'Set the ending time' (with a close icon).

Login your Reco account, click “Task” -> Click “+” on the top right corner -> Click “Period”.

You can turn on/off the appliances at the set duration.
E.g. turn off the light during 9:00 am. —17:00 pm.

Delay task

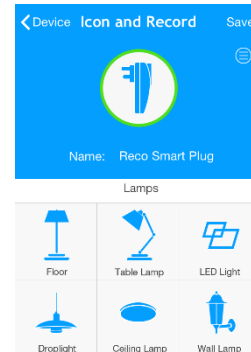

Login your Reco account, click “Task” -> Click “+” on the top right corner -> Click “Delay”.

You can turn on/off the appliances after a period of time.
E.g. turn off the light after 30 minutes.

The screenshot shows the 'Delay' configuration screen. At the top, there are tabs for 'Timing', 'Period', and 'Delay', with 'Delay' selected. Below the tabs, there are several input fields: 'Name', 'Default name' (with a close icon), 'Object', 'Select Device', 'Event' (with 'Turn On' selected and a green checkmark), 'Turn Off', 'Description', 'No loop' (with a close icon), and 'Duration'.

Customize icon

Login your Reco account, long press the device and click "Edit" -> Choose the icon and edit the name -> Click "Save" on the top right corner.

You could modify the name of connected device as well.

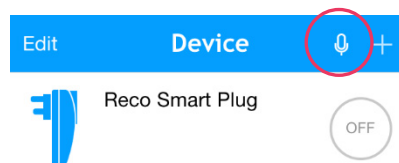

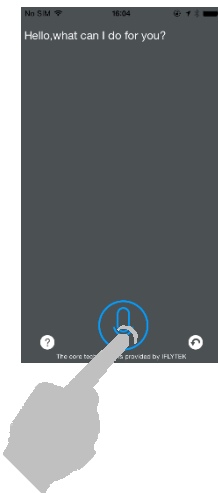

Voice control

You can control Reco App by voice command.

Please notice that:

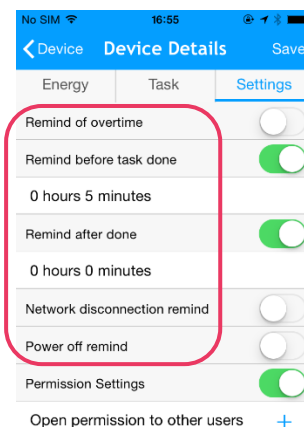

"Turn on the light" ("light" is the device name, if the device you edited is "floor lamp", you need to say "turn on the floor lamp")

You can also command like this: "turn the light on"

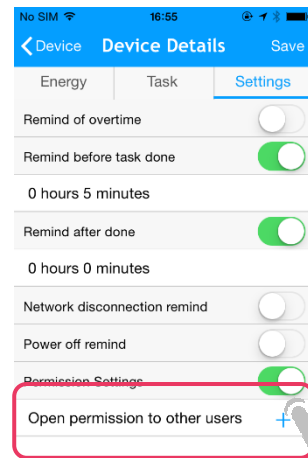

Push notification

Login your Reco account, click "Device Details" -> Click "Settings" -> Set the push notification that you need.

Authorize other users

Login your Reco account, click “Device Details” -> Click “Settings” -> Click “+”marked -> Fill in the usernames of your families or friends, then they will get the permissions to control and monitor your plug.

Energy monitoring

Login your Reco account.
Click the device to view the current power and cost.
Click the blue area to view the historical data.

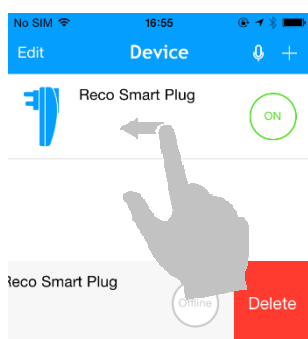

Feedback

Login your Reco account.
Click “Mine” -> Click “About Reco”.
Click “Feedback”.

Delete the plug

Tips:

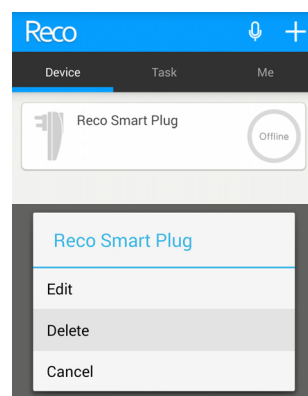

With iOS App, you can swipe left to delete the device.

iOS

Tips:

With Android App, you can long press to edit the device.

Android

FCC Certification Requirements

Caution: Any changes or modifications in construction of this device which are not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The antenna(s) used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons.
